

The first family of all natural Sweeteners

Vegan • All Natural • Gluten Free • Kosher • Diabetic Safe

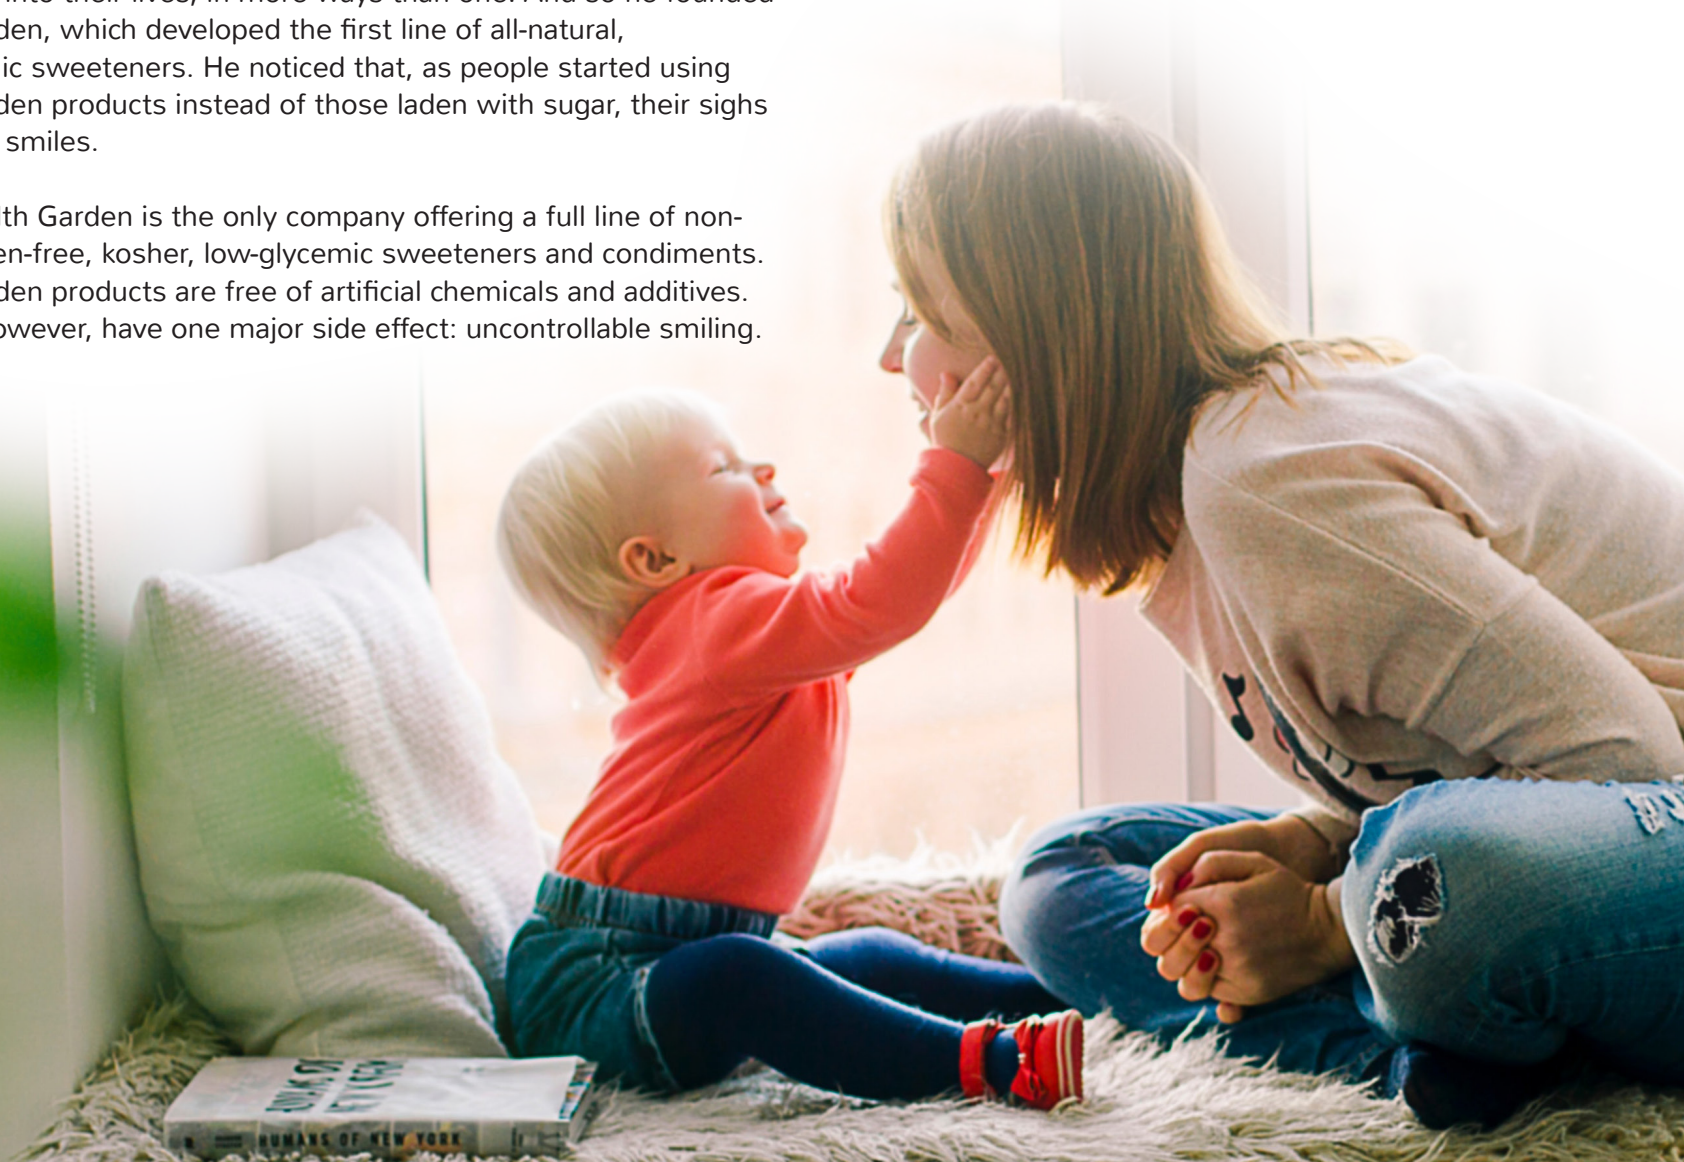

## HOW WE STARTED

As manager of a health food store, Joel Phillip met many people with diabetes and other chronic diseases related to sugar consumption. He noticed that, in addition to being unhealthy, these customers were unhappy.

That was more than a decade ago. Joel decided to bring a little sweetness into their lives, in more ways than one. And so he founded Health Garden, which developed the first line of all-natural, low-glycemic sweeteners. He noticed that, as people started using Health Garden products instead of those laden with sugar, their sighs turned into smiles.

Today, Health Garden is the only company offering a full line of non-GMO, gluten-free, kosher, low-glycemic sweeteners and condiments. Health Garden products are free of artificial chemicals and additives. They do, however, have one major side effect: uncontrollable smiling.

## At Health Garden

we believe that a healthy lifestyle and positive outlook on life go hand in hand. Indeed our customers' happiness is our priority, which is why we offer only the highest quality all-natural, low-glycemic sweeteners.
