

**WET Hydration is the perfect blend of function and taste. Our company's innovative approach stems from creating a healthy beverage product that combines the benefits of a cold pressed juice, coupled with the shelf stability and price point of household beverages.**

**Our drinks quench more than just thirst. Each elixir is delicious, functional and made of carefully curated nutrients to provide total hydration.**

**Every product we produce supports specific health goals & functionality: from energy and immunity boosts to replenishing electrolytes, and punching up the vibrancy of physical appearance.**

**Our 12 oz BPA free bottles were designed with efficiency, fashion, and the industry in mind. Our eye-catching, minimalistic design is unlike any other product on the market -- allowing for customers to quickly decide WET Hydration is the right choice.**

**WET Hydration is more than a beverage brand. WET stands for 'Weaving Everyone Together.' Our mission is to grow into a company that's a pillar in the communities we're sold in. With a purpose that all can find meaning in, WET is primed to make an impact in the marketplace.**

**Together, all WET drinks aim to strengthen overall hydration throughout the day. Every bottle of WET Hydration carries an identity connecting benefits with benefit-seekers -- people who are Weaving Everyone Together.**
