

Amy's is a leader in Frozen Entrees and the #1 selling Natural/Organic brand

Family Owned

A family-run business for over 30 years, we are purpose driven and committed to doing the right thing for people and our planet.

Cooked with Care

Our meals are made from whole organic ingredients and simmered and stirred in real kitchens, resulting in delicious, homemade flavors of the highest quality. The unmatched taste is what keeps consumers coming back for more.

Committed to Organic

We've been committed to organic and non GMO since our start because we know it's better for people and our planet. But we also think that it just plain tastes better. By using organic fruits, vegetables, and grains in our products, we avoid over 700 chemicals that can be found in conventional food production.

Something for Everyone

No meat, seafood, poultry, eggs or peanuts are ever used in Amy's products. Dairy cheeses are made with pasteurized rBST hormone-free milk and don't contain animal enzymes or rennet. And we make many meals suitable for those following gluten free, vegan and low sodium diets.
