Value Added Services included in your quote:
 Our thorough formula review involves the evaluation of each ingredient in your formula to ensure they meet minimum safety requirements in Canada. This process also ensures that the necessary efficacy/health claim requirements for Canada are met for at least one medicinal ingredient.

We provide advice on health claims based on pre-cleared information. We also take into account the health claims you want to make and if they are feasible. We will also provide suggestions for alternative ingredients if there is a lack of safety for any of the ingredients currently in your formula must be removed.

Health Canada does not allow proprietary blends, however, we will work with you to preserve part of the proprietary nature of your blend by determining if any of the ingredients can be positioned as non-medicinal ingredients (where the quantity of those ingredients is not disclosed.)

We can assist you with our distributor and broker network that is connected with various channels in Canada (Food, Drug and Mass; Independent; and Specialty channels) to maximize your sales success in the Canadian market.

Additional Solutions we offer:
 We are a Health Canada licensed importer of Natural Health Products through Quality IMPORT Solutions, Inc., and we provide a range of importing services. Please ask us for details.

We can provide artwork design conversion to efficiently produce a compliant bilingual label.

We offer USA FDA Regulatory Compliance Solutions to ensure your product is compliant with Dietary Supplement regulations.
