Dear Valued Customer,

Danone North America manufacturing facilities have defined Preventive Controls/HACCP programs focused on food safety as required by the FSMA/Preventive Controls-Human Food rule. These facilities are also certified through the GFSI recognized FSSC 22000 Food Safety System which is based on ISO standards . Food safety verification audits are conducted by the Plant Quality Team. Danone North America's Food Safety Plans are confidential; however, they are available and can be reviewed by our customers at our sites.

Sincerely,

Shivani Gupta
