To Whom It May Concern:

We have been made aware that there is a concern regarding the melting point of the Jealous Sweets as per advise by our Manufacturer.

**MELTING POINT:** there is no melting point for jellies products with carrageenan or pectin. It is a combination of two parameters: moisture and temperature.

**PRESERVATION/STORAGE:** the ideal preservation and storage environment for jelly confectionery products with carrageenan or pectin is to have a temperature below 40 °Celsius. In any case, the product will melt if the temperature exceeds 45 °Celsius. The ideal preservation and storage environment for jelly confectionery with carrageenan or pectin is to store them in a cool and dry place: the moisture must be below 50%.

Sincerely,

Imran Merza

Co-founder & Candy Magician for Jealous Sweets
