1 Waste can be generated at multiple points, especially Raw Material Feeding, Mixing/Blending, and Filling/Packaging. The waste is collected and taken to waste disposal areas.

2 Rework (including in process reclaimed product/add-back) can be generated at feeding/blending, packaging, and storage stages.

PC5 - Sanitation PC Steps 6, 7, 8, 10, 11 and 12 are controlled by Sanitation Preventatve Control.
