### Allergen (Gluten Free) Statement

The manufacturing facilities of GT's Living Foods located at 4646 Hampton Street, Vernon, CA 90058 and 4415 Bandini Boulevard, Vernon, CA 90058 only have coconut (tree nut) as an allergen in the processing facilities. Both sites **do not** process any of the other major allergens (USA, UK, and Canada), which include gluten. There is a dedicated line at both sites that run the products that contain the coconut (tree nut) allergen, they are scheduled to run at the end of the production day, have a validated sanitation cleaning process to remove all allergen residues, and perform verification allergen-specific swab testing after sanitation to ensure processing lines are allergen-free. All products from GT's Living Foods are inherently gluten free, as there are **no** gluten-containing ingredients used in processing.

Regards,

Leonardo Dorame  
Director of Food Safety & Quality  
GT's Living Foods
