RE: GMO & BE STATEMENT

To Whom It May Concern:

This document is to confirm that our products are not certified Non-GMO but the finished product will typically test negative for all GMO's as any amounts potentially introduced are of insignificant quantities. Bioengineered foods are defined as those that contain detectable genetic material that have been modified through lab techniques and cannot be created through conventional breeding or found in nature. True Citrus products are not made using bioengineered ingredients. True Citrus products do not require a Bioengineered Disclosure Statement.

In addition, all of our products are 100% GRAS, as defined by the FDA, and manufactured in accordance with good manufacturing practices, under modern sanitary conditions, and under a Food Safety Plan audited to SQF standards.

If we can be of further assistance, please do not hesitate to contact us.

Sincerely,

A handwritten signature in black ink, appearing to read 'Rich Soper'.
